

Multi-array Nano-optic Filters

—ENHANCE CAMERA INSPECTION CAPABILITY

Each pixel cell in the array above may contain a different optical filter type designed to align to hyper-spectral or multi-spectral cameras.

Moxtek® Multi-array Filter Options

- Wire-grid Polarizers
- QWP/HWP Polarizers
- Metalens (VIS-IR)
- DOE/MOE Metasurface
- Color Filters
- Apertures (Reflective/Absorptive)
- Anti-Reflective Coating
